More Details

Encoder, Switcher, Monitor, Record All in One

A studio and play device will allow you to do Full HD live streaming, multi-camera production, picture in picture, watermarks and many more.

Support 4K1080P , 1080I , 720P, etc.

Distribute high-quality video to your website, apps, Cloud and social channels. Your videos will be ready for viewing within seconds and will be captured with high resolution and great contrast.

6 "HD Touch Screen

Compact interface design, convenient operation buttons and simple operation mode are available to make live streaming more simple

Support various kinds of captures

V360 not only can stream from DSLR, DV, action cams, drones, Youtube and Facebook, but now available to stream your screen from mainstream smartphones, tablets and computers.

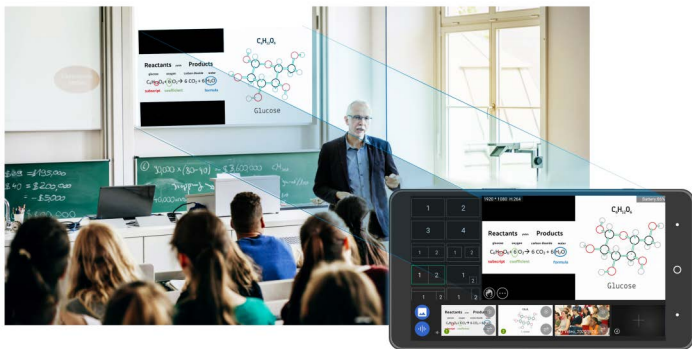

Support multiple video signal access

Support to insert PPT, PDF, WORD, pictures live. Apple devices can be streamed directly to V66 by airPlay. MP4 video features video fast and slow playback.

Multi-camera Production

V360 allows users to do live streaming from two different video sources. You can choose to broadcast from two cameras, from a combination of one camera with your local video, or even from two local video sources.

Image for Screen

The live broadcast can be output through HDMI, which is suitable for real-time screen display of all kinds of live broadcast activities.

Multi-Screen Director

You can now decide which video source you would like to appear on the screen with one simple click. (Supports for multi-station switching, monitoring, mixing, tuning, recording and others to meet the needs of all kinds of live streaming activities.)
